

Southern Yellow Pine

Southern Yellow Pine (SYP) is the perfect choice for interior paneling and ceilings. Renowned for sustainability and cost effectiveness, southern yellow pine provides a golden color with beautiful grain patterns. Its strength and density make SYP a great option for both commercial and residential applications.

By drying to 10% MC in conventional hardwood kilns, our SYP products provide dimensional stability and fully set sap. Our pine products are available in clear and knotty options. Also, we have the unique ability to provide a vertical grain pine for improved appearance and functionality.

Sustainable, beautiful, and cost effective...
