

Red Grandis Siding and Paneling

Red Grandis is a consistent, premium quality wood ideally suited for siding and paneling, along with furniture, cabinetry, mouldings, windows and doors. Renowned for stability, it serves as an excellent alternative to clear western red cedar, Spanish cedar, and mahogany for both interior and exterior applications.

Red Grandis offers an economical and green alternative to many tropical hardwoods. Versatile and strong, this beautiful hardwood is 100% FSC® certified.

The heartwood can vary in color from pale pink to medium pink. It has a uniform, but moderately coarse textured grain which is usually straight or slightly interlocked.

An economical and green alternative...
